## Logging In

- Login to HealthMap from the main page in the upper right-hand corner
- Click on 'forgot password' if needed

[Register](#) | [Forgot Password?](#)

Search   [Advanced Search](#) [Full Screen](#)

Map | Satellite | Earth | Terrain

**Outbreak Missing?**  
Add it to the map

POWERED BY Google

Quick Views [Terms of Use](#)

Activity  Low  High  Country level

## Main Page Features

- Default map view shows previous 3 days
  - If logged in a custom default view can be set or you can visit ‘Advanced Search’ to change the time window
- Pins are for precisely placed alerts; Dots represent country, state, or province-wide alerts
- The color of the marker is based on an algorithm reflecting:
  - Time-frame of alerts
  - Number of alerts for location
  - Number of sources providing info
- QuickViews
  - Preset tabs to quickly view specific data
    - Current tabs for Previous 3 days, Oil Spill related, User submitted, Recently rated, Worldwide, and Haiti
    - Logged in users are able to manage order of tabs, tabs available, set a ‘home’ view, and share tabs with other users

## Multi-Stream Alarming: Heat Index

- Meta-alert composite score, based on
  - Number of sources providing information at a particular location
  - Recentness of alert
  - Reliability of source
- Marker algorithm
  - Exponentially weighted alerts
  - Increase heat (redness) for more recent event and higher impact

low

high

- We are working on updating this algorithm to reflect additional variables such as:
  - Morbidity, mortality, virulence for specific diseases
  - Population

## Search Box

- Auto-fill search box shows diseases and locations matching text and will zoom to chosen location or show all alerts matching chosen disease

The screenshot displays the HealthMap website interface. At the top, there is a search bar with the text "Search menin" and a "go" button. Below the search bar, a dropdown menu lists several disease categories: Bacterial Meningitis, Meningitis, Meningitis - HiB, Meningitis - Neisseria, Meningitis - Strep/Pneumococcal, Meningococemia, and Viral Meningitis. The main map area shows a world map with numerous orange pins indicating alert locations. The map is zoomed in on the Americas. At the bottom, there is a legend for the Activity Index, showing a color scale from Low (yellow) to High (red) for both Country level and Province or local level. There are also buttons for "Alerts from last 3 days", "Oil Spill Related Alerts", and "User Submitted Reports".

## Advanced Search Feature

- Advanced search opens a box showing currently selected settings
  - Allows for a customized view of specified diseases, locations, alert feeds, and time-frame

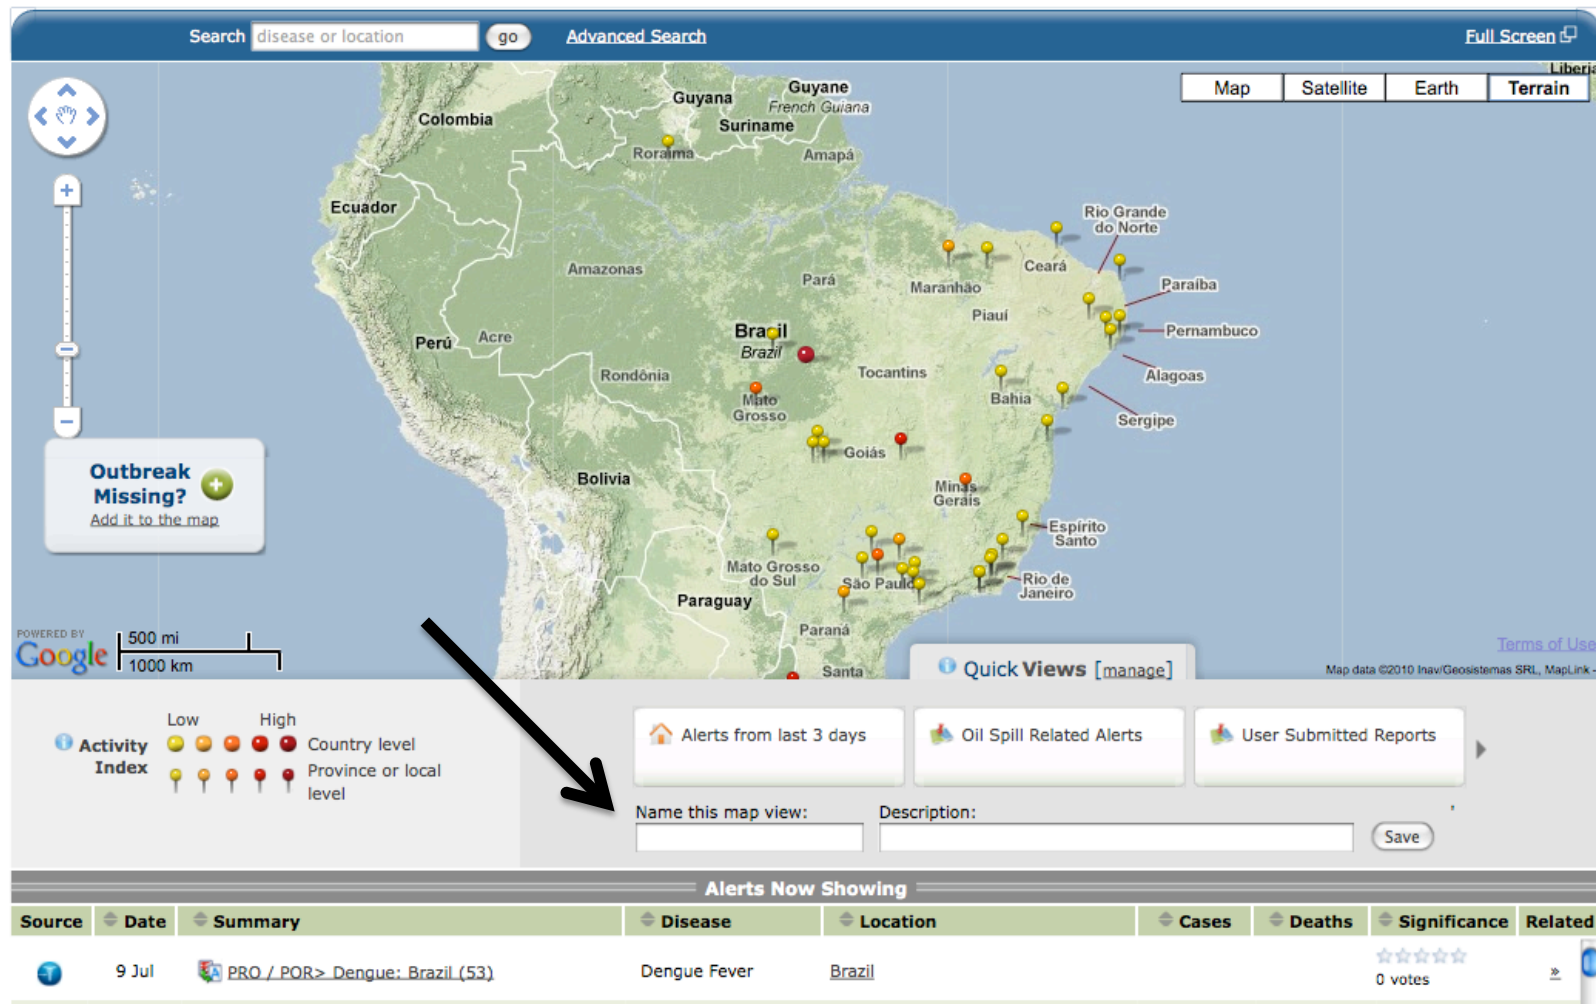

## Advanced Search Feature

- Selecting 'Dengue' as the disease and 'Brazil' as the location zooms user to Brazil and shows only Dengue alerts
  - Gives option below to save as a QuickView if logged in (see arrow)

Search   [Advanced Search](#) Full Screen

The 'Related Alerts' window will provide additional alerts from the same country and for the same disease

## Full Screen Mode

- Clicking Full Screen Mode:
  - Opens map fully and rotates between alerts and zoom levels
  - ‘Stop marker rotation’ in upper left-hand corner will pause movement
  - Use ‘Esc’ key to exit

## List View of Alerts on the Map

- Alerts showing on map are also available in list format at the bottom of the screen to include:
  - Alert source
  - Date and title of alert
  - Disease and location
  - Cases and deaths (as listed in alert)
  - Significance rating (if available)
- Alerts can be sorted by these variables

Sorted by #  
of cases

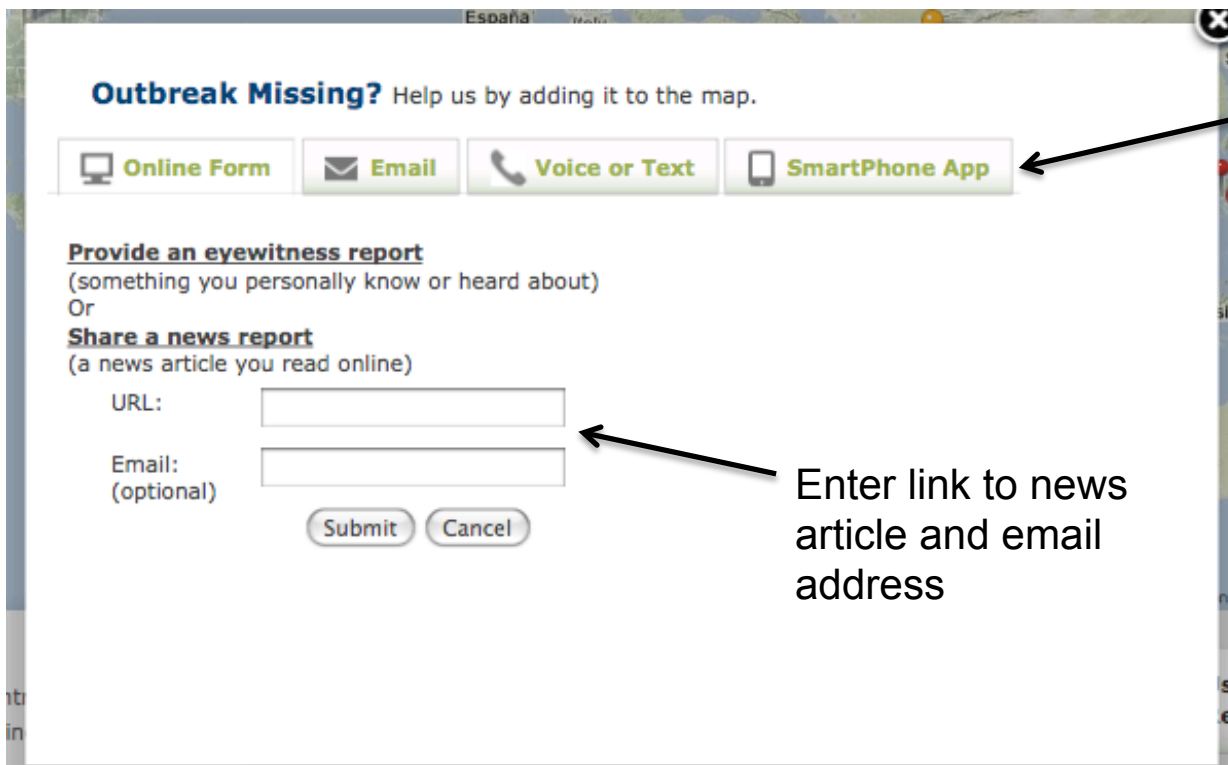

Alerts Now Showing								
Source	Date	Summary	Disease	Location	Cases	Deaths	Significance	Related
